RE: Request for Surety Release, Minerals Recovery Corporation,
South Lisbon Mine, ACT/037/018, San Juan County, Utah

In response to Minerals Recovery Corporation's (MRC) request for release of the remaining surety on the reclaimed South Lisbon Mine site an inspection of the area was undertaken by Division staff on June 25, 1985. The inspection showed revegetation to be generally well established, with very little erosion potential (see Memo to File attached). Overall the average vegetation cover was sufficient to meet the required revegetation standard. It is recommended that steps be taken at this time to release the surety to MRC.
